2	Presentation of purpose of the day and process for the workshop
4	4x rounds of panel discussions of countertrade models
5	Recap of discussion to the countertrade models
6	Presentation of next steps
7	AOB

The workshop process

At the workshop the models will be discussed separately in four rounds. All participants will participate in each round and thereby in the same discussion. A few market participants have been asked to participate in a panel, however all market participants have the possibility to ask questions and provide comments to the discussion.

After each round of panel discussion, the participants will be asked to rank the model according to the 5 evaluation criteria in an interactive poll. The criteria are specified in the impact assessment report.

When all teams have had the opportunity to comment on all models, there will be a recap of all inputs.

There will be a one hour lunch break and short breaks provided during the day.
