Balancing

Purchase and sale of balancing gas

Definition of Energinet.dk neutral price for balancing gas:

The weighted average of all within-day trades at Gaspoint Nordic within the gas day, expressed in DKK/kWh. However the price cannot deviate more/less than 10 per cent from the Gaspoint Nordic Spot Index for the gas day.

- Resulting price converted into DKK/kWh using the daily exchange rate as published by Danmarks Nationalbank (the Danish Central Bank)

Energinet.dk's purchase price for balancing gas

- Adjustment step 1:	Neutral gas price minus 0.5 % of the neutral gas price
- Adjustment step 2:	Neutral gas price minus 3.0 % of the neutral gas price
- Marginal purchase price:	Lowest price of either 1) lowest traded price by Energinet.dk in the yellow zone during the relevant gas day, or 2) the relevant adjustment price (step 1 or 2). However, the price will not amount to less than 65 per cent of the neutral gas price.

Energinet.dk's sales price for balancing gas

- Adjustment step 1:	Neutral gas price plus 0.5 % of the neutral gas price
- Adjustment step 2:	Neutral gas price plus 3.0 % of the neutral gas price
- Marginal sales price:	Highest price of either 1) highest traded price by Energinet.dk in the yellow zone during the relevant gas day, or 2) the relevant adjustment price (step 1 or 2). However, the price will not amount to more than 135 per cent of the neutral gas price.

In situations of "Early Warning", "Alert" or "Emergency", Energinet.dk can increase the adjustment percentages up to 100 %, for both adjustment step 1 and 2, and can remove the minimum and maximum price levels.
