

Aims to harmonize and align with international ambitions

Wider the balancing markets

Give better price signals

Five party agreement signed on March 9th 2018

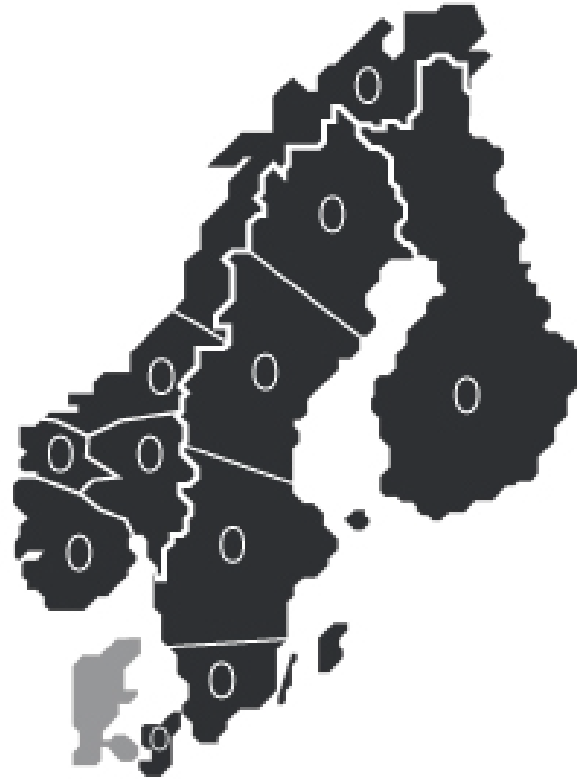

How will tomorrow's balancing concept work?

Current Nordic balancing model –
50 Hz for the whole region

New balancing concept –
balanced ACE for each sub region

Concept responds to system changes and European frameworks

Closure of thermal power plants

Increased share of wind power

Decommissioning of Swedish nuclear power plants

Increased interconnector capacity out of the Nordic power system

Alignment with EU network codes and integration with future European platforms taken into account

Balancing Concept Roadmap
